

# Report Rascal ESI4 - Download and Installation Guide

These instructions will guide you through the entire process of downloading and installing Report Rascal; you may find it useful to print this document using your browser's Print option.

The installed software will be full-featured, with minor usage restrictions – you will be able to fully explore all functions of the software *with no obligation to buy*.

## 1. Download.

Download the installation file from [www.report-rascal.co.uk/download](http://www.report-rascal.co.uk/download).

At the start of the download process your computer will ask what you want to do with the download file ("RR42Setup.exe") – you should select the "Save" option. We suggest you select "Desktop" as the Save location, but you can use another location if you like.

The download will take about fifteen minutes over a standard dial-up Internet connection; if you have Broadband, the process should take only a few minutes.

## 2. Install.

Start the installation of Report Rascal by opening the download file "RR42Setup.exe" – depending on your version of Windows, and the way it is set-up, this can be done in a number of ways: -

- a) Single click on the download file  
**or**
- b) Double-click on the download file  
**or**
- c) Click the "Start" button and select "Run...". Click "Browse..." then navigate to the folder containing "RR42Setup.exe" and click "Open" then click "OK" in the Run window.

Any of the above actions will start the installation process – you should then follow the on-screen instructions.

**Note:** Some of our visitors have reported installation problems with an apparently damaged download file – this appears to be related to those connecting via particular ISPs (Internet Service Providers). If the installation process reports an error when started, please visit [www.report-rascal.co.uk/cd](http://www.report-rascal.co.uk/cd) to request a free installation CD.

We regret that we are unable, at present, to mail CDs to non-UK customers but can provide further advice and assistance via our support page at [www.report-rascal.co.uk/support](http://www.report-rascal.co.uk/support).

## 3. Evaluate.

On completion of Step 2 (Install), start Report Rascal. You can run the program in Evaluation mode as many times as you like.

## 4. Purchase Instructions.

In order to unlock the software for unrestricted use, you will need to purchase a Licence. Select the "Purchase" option at start-up and follow the on-screen instructions.

## 5. Problems?

Visit [www.report-rascal.co.uk/help](http://www.report-rascal.co.uk/help) to resolve common installation and usage issues.

**Thank you for your interest in Report Rascal.**
